DESCRIPTION:

Aerosol foaming oven cleaner.

AREA:

For use on gas and electric ovens.

USAGE DIRECTIONS:

Wear rubber gloves and eye protection when handling this product. Do not spray on pilot light in gas ovens, or the heating element in electric ovens. For best results, use in a warm (150 – 180 degree) oven. Shake can well, hold upright and spray at a distance of 9-12 inches away from the surface to be cleaner. Avoid inhaling the spray mist. Allow the foam to work for 5-10 minutes, then wipe clean with a wet cloth, sponge, or paper towels. For heavily encrusted areas, repeat as necessary. Recommended for use on porcelain, enamel, iron and stainless steel ovens. Do not use on surfaces such as aluminum.

Read and understand label and Material Safety Data Sheet (MSDS) for complete listing of hazards, precautions, first aid statements, storage and handling information. Use according to directions.
